DURATION	4 Months Each

TENANT IMPROVEMENT

Cannabis House is an upcoming chain of Recreational Cannabis Dispensaries. We were asked by our clients if we could build 4 locations for their future businesses. The interior renovation includes adding a secure cannabis room which is a strictly controlled partition construction which includes steel studs, steel mesh, 16ga sheet steel, 5/8th inch drywall, anti spread bracing, 14ga door frames all to AGLC standards. The sales area includes a hanging trellis which houses lighting, and security systems. Expected completion ranging from recreational cannabis legalization day October 17, 2018 to late October 2018.
